

*Hygienic and without joints:*

## **Silikal flooring in a farm shop**

**Expect more from your floor.**

Hygienic and low maintenance:

## Silikal flooring for farm shops

Hygiene and ease of cleaning were two prime concerns when it came to fitting new flooring in the Gafrenz farm shop (Austria). These are just some of the many expectations which will be met here by Silikal reactive resin systems in the future. Completely jointless surfaces offer the utmost in mechanical and chemical durability, not to mention a neat appearance. The milk process-

ing area and dairy were fitted out with 960 square metres of blue coloured quartz flooring, while the butcher's was given a new look with 250 square metres of flooring in red and grey. The new surfaces were laid in no time; within the space of one to two hours they were fully cured and ready for normal wear and tear.

*Skillfully applied by qualified installers and the new floor is fully cured and ready for action within one hour. A perfect way to keep your operation running wide open.*

**Expect more from your floor.**

Certified Quality and Ecology Management Systems
